WARNING: Colorflow valves are not repairable

### /!\ WARNING – USER RESPONSIBILITY

FAILURE OR IMPROPER SELECTION OR IMPROPER USE OF THE PRODUCTS DESCRIBED HEREIN OR RELATED ITEMS CAN CAUSE DEATH, PERSONAL INJURY AND PROPERTY DAMAGE.

- This document and other information from Parker-Hannifin Corporation, its subsidiaries and authorized distributors provide product or system options for further investigation by users having technical expertise.
- The user, through its own analysis and testing, is solely responsible for making the final selection of the system and components and assuring that all performance, endurance, maintenance, safety and warning requirements of the application are met. The user must analyze all aspects of the application, follow applicable industry standards, and follow the information concerning the product in the current product catalog and in any other materials provided from Parker or its subsidiaries or authorized distributors.
- To the extent that Parker or its subsidiaries or authorized distributors provide component or system options based upon data or specifications provided by the user, the user is responsible for determining that such data and specifications are suitable and sufficient for all applications and reasonably foreseeable uses of the components or systems.

### OFFER OF SALE

The items described in this document are hereby offered for sale by Parker-Hannifin Corporation, its subsidiaries or its authorized distributors. This offer and its acceptance are governed by the provisions stated in the detailed "Offer of Sale" elsewhere in this document or available at <a href="https://www.parker.com/hydraulicvalve">www.parker.com/hydraulicvalve</a>.

### **SAFETY GUIDE**

For safety information, see Safety Guide SG HY14-1000 at <a href="https://www.parker.com/safety">www.parker.com/safety</a> or call 1-800-CParker.

### **General Description**

Series F flow control valves provide precise control of flow and shut-off in one direction, and automatically permit full flow in the opposite direction.

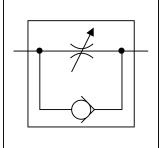

### Operation

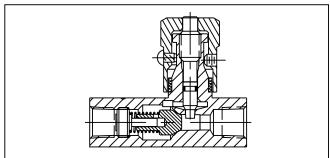

A two-step needle allows fine adjustment at low flow by using the first three turns of the adjusting knob. The next three turns open the valve to full flow, and also provide standard throttling adjustments.

### **Features**

- The exclusive "Colorflow" color-band reference scale on the valve stem is a great convenience and time-saver in setting the valve originally and in returning it to any previous setting.
- A simple set screw locks the valve on any desired setting.
- A tamperproof option (T) feature is also available to prevent accidental or intentional adjustment of flow setting.

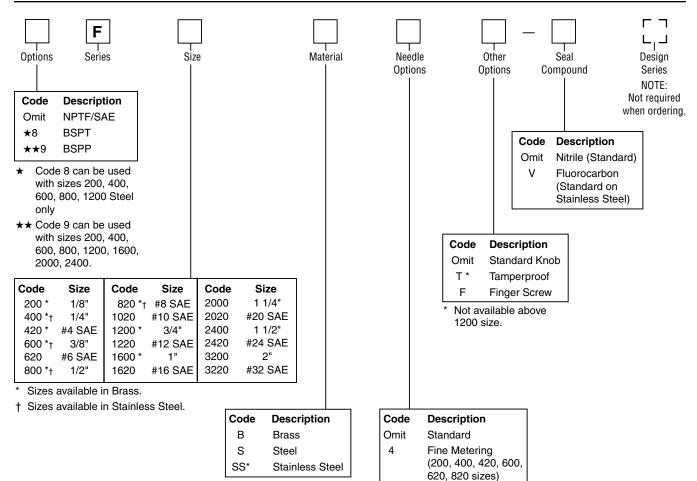

### **Specifications**

### **Ordering Information**

### **Series F**

Series F Brass and Stainless Steel Valves can be used for both air and oil service.

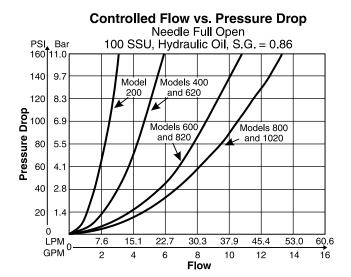

\* Available in 400, 600 800, and 820 sizes only.

## **Knob Options**

Tamperproof Option (Code "T") permanently locks knob at desired flow setting by installing a pin in predrilled hole.

Finger screw Option (Code "F") provides this thumbscrew in place of set screw.
